GitHub Pages Example	1

Static Deployment Model

Publish the `html/` directory to any static host.

Recommended Hosts

- GitHub Pages
- Netlify
- Vercel
- traditional Apache/Nginx hosting

Minimal Checklist

1. Confirm legal placeholders in `html/impressum.html` are replaced.
2. Update `html/sitemap.xml` with production domain.
3. Validate `html/robots.txt` directives.
4. Run `make validate-all`.
5. Verify all five primary navigation pages.

GitHub Pages Example

```
# publish html folder to gh-pages branch
git subtree push --prefix html origin gh-pages
```
