1. Overview

This repository contains a modern static website for the TSV Rudow Foerderverein.

Primary navigation and content architecture are centered on five core pages:

1. Philosophie
2. Satzung
3. Ansprechpartner
4. Beitrittsformular
5. Aktuelles

2. Architecture Principles

2.1. 1. Content-first information architecture

The content model is topic-based and mirrors the migrated Foerderverein source material.

2.2. 2. Lightweight technical stack

- HTML5 for semantic structure

- CSS3 for design system and responsiveness
- no framework dependency

2.3. 3. Maintainability

- Shared navigation pattern across pages
- Unified global stylesheet in `html/css/style.css`
- Editorial source data in `docs/content/foerderverein/`

2.4. 4. Accessibility and UX

- keyboard-focus-visible navigation and gallery links
- responsive layout behavior for desktop/tablet/mobile
- reduced-motion support via `prefers-reduced-motion`

3. Repository Structure

```
tsv_rudow_fv/  
|-- html/  
|   |-- index.html  
|   |-- philosophie.html  
|   |-- satzung.html  
|   |-- ansprechpartner.html  
|   |-- beitriffsformular.html  
|   |-- aktuelles.html  
|   |-- impressum.html  
|   |-- robots.txt  
|   |-- sitemap.xml  
|   |-- css/style.css  
|-- docs/  
|   |-- index.adoc  
|   |-- README.adoc  
|   |-- BUILD.adoc  
|   |-- content/foerderverein/  
|   |-- diagrams/  
|-- Makefile  
|-- README.md  
|-- CHANGELOG.md  
|-- CONTRIBUTING.md
```

4. Content Workflow

Recommended process for content edits:

1. Update structured source notes in `docs/content/foerderverein/`.
2. Apply approved copy changes to `html/*.html` topic pages.
3. Verify navigation consistency and metadata.
4. Run validation targets from the `Makefile`.

5. Validation and Build

```
make diagrams
make pdfs
make validate-all
```

6. SEO and Indexing Strategy

- Public pages are listed in `html/sitemap.xml`.
- Non-public/support pages can be excluded with meta robots and/or `robots.txt` rules.
- Legal page (`impressum.html`) is excluded from indexing.

7. Deployment

The website is static and can be deployed by publishing the `html/` folder to any static host.

8. Notes

The documentation set is intentionally domain-specific and focused on ongoing Foerderverein operations.
