Responsive Principles	1
Verification Checklist	1

Breakpoints

- Desktop: default styles
- Tablet: `max-width: 920px`
- Mobile: `max-width: 640px`

Responsive Principles

- horizontal navigation remains usable via scroll on small widths
- gallery collapses from multi-column to single-column
- content cards maintain readable padding and typography
- data modules stack vertically on smaller screens

Verification Checklist

1. Check top navigation wraps/scrolls correctly on mobile.
2. Confirm topic image cards remain legible.
3. Confirm table modules are readable on mobile.
4. Confirm touch targets and focus styles remain visible.
